

TEGManager

Utility - Quality Assurance

Device Manager:

- Manages:
 - User credentials & different level of access
 - Network connectivity
- Bi-directional connectivity to devices
- Connectivity to middleware for Patient Identification
- Device-specific reports (i.e., uptime, error logs, etc.)
- Aggregates TEG data from several Analyzers into a centralized data repository
- Provides centralized administration (i.e., User IDs)
- Connectivity between devices and middleware

TEG Viewer + Device Manager = TEG Manager

Med TEG® Manager får du en dashboardvisning af alle dine TEG-instrumenter og deres nuværende status. Du får mulighed for at administrere brugerkonfigurerbare komponenter og brugere for en eller flere personer.

Teg® 6s enheder leverer enhedsspecifikt rapporteringsværktøj for ikke-kliniske data samt mulighed for at kommunikere patient- og testdata mellem enheder og hospitalssystemer.
